DETAILED ACTION

Drawings

Figures 21-22 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-9 and 12-18 are rejected under 35 U.S.C. 102(a) as being anticipated by over Naoe et al. (US5997153).

With respect to claims 1-4, 9, 18, and 12-15, Naoe show in Fig.14 a light source 12, a collimator lens 19, a holder having a tubular portion for holding the light source 12 and the lens 19, wherein the internal surface of the tubular portion has a recess 20 in which the lens held penetrating the tubular portion from inside to outside.

With respect to claims 5-6, Naoe show in Fig.14 the recess is space provided for supporting the lens 19 and the tubular portion has a fixing part to fix the lens 19.

With respect to claims 7-8 and 16-17, Naoe show in Fig.14 the lens is fixed to the holder by an adhesive21 in the fixing part.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-23, 26-29, and 32-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Naoe et al. (US5997153) in view of Murakami et al. (US5781351).

With respect to claims 19, 21-23, 26, 28-29, 32-33, and 35-36, Naoe et al. (US5997153) show in Fig.14 a light source 12, a collimator lens 19, a holder having a tubular portion for holding the light source 12 and the lens 19. Naoe do not disclose the first and second recessed portions in the tubular portion. Murakami teach in Fig.20 a first recessed portion 340 and a second recessed portion 311, which is shorter than the first recessed portion 340, for pouring an adhesive into the part between the lens and the tubular portion. For the benefit of a lens holder, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Naoe first and second recessed portions as taught by Murakami.

With respect to claims 20, 27, and 34, Murakami show in Fig.20 first and second recessed portions are penetrating from inside to outside.
